### **DETAILED ACTION**

This Office Action is in reply to communication filed on 01/12/2009.

#### ***Related Appeals and Interferences***

1. In view of the Appeal Brief Filed on 01/12/2009, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 as this Office action is non-final; or,
- (2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below.

#### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1 and 5 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject matter (such as an article or material) to a different state or thing. See page 10 of *In Re Bilski* 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that accomplishes the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process. The computerized method "for predicting the correct addressee with the steps of analyzing at least one of a set of attributes of the user related history information using text mining methods for associating attribute values and providing a data mining model for addressee proposal and prediction result ..." is broad enough that the claim could be completely performed mentally, verbally or without a machine nor is any transformation apparent.

Claims 2-4, and 6-11 depend respectively on base claims 1 and 5 and are rejected for the same reason as the base claims.

4. Claims 12 and 16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 12 and 16 recite the steps of "A computerized system that comprise different means for predicting a correct addressee to be filled-in in an addressee field in an e-mail system, whereby user-related history information, including the user's prior sent and/or received e-mail, is analyzed for associating the most probable addressee for an

e-mail to be addressed..." in the context of the claimed invention are interpreted by the Examiner to represent computer code or concept, which does not have a practical application or tangible result. The "means for analyzing attribute values..., means for weighting single analysis results..., and means for conveying probable address proposal to the user..." as recited in the claims are not described in the specification with written description to convey for example the presence of hardware or statutory system under 35 U.S.C. 101.

Claims 13-15, and 17-22 depend respectively on claims 12 and 16 and are rejected for the same reason as the base claims.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 23 and 27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. The claims recite the phrase "a computer-readable storage medium ..." not found in the specification. It is however appreciated that the language in question here was present in the claims as originally filed.

Accordingly, please amend the specification to include this language or amend

the claims to remove this language in accordance with the MPEP 2163 (I)(B).

Claims 24-26, and 28-33 depend respectively on claims 23 and 27 and are rejected for the same reason as the base claims.
